

Level 5 Operations Manager Apprenticeship

Building a Portfolio

All Operations Manager apprentices are required to create an electronic portfolio. This is made up of examples of the knowledge, skills and behaviours that you have gained and applied during the on-programme phase of your apprenticeship and will include evidence of both written and practical activities. While not directly assessed, the portfolio is used to underpin the professional discussion element of your End Point Assessment (EPA).

Your portfolio will consist of pieces of evidence, which could include examples of:

- **Written accounts of activities** that you've completed, such as examples of Apply exercises from different units of study
- **Completed end-of-unit assessments**
- **Feedback or comments on exercises and assignments** from your tutor or training provider
- **CPD record**, which should log key activities undertaken, the time spent on them and learning gained
- **Personal development plan**
- **Other written feedback** from managers, supervisors or peers
- **Presentations** you've given
- **Brief notes or records of conversations** with line managers or mentors in relation to how you have applied your new knowledge in practice
- **Observation records** from you, your programme leader, and your line manager or mentor
- **Performance review**
- **Evidence of additional learning opportunities** you have undertaken during your apprenticeship

Your portfolio should **not include**:

- Evidence that cannot be directly attributed to you
- Methods of self-assessment

In addition, you should ensure that you check your evidence to ensure that it does not breach any data protection, confidentiality or safeguarding policies or laws.

It can be difficult to choose which items to select for your portfolio. As a guide, you'll need to ensure that you have at least one piece of evidence mapped against each of the knowledge, skills and behaviours that will be assessed in the professional discussion. This information will be available from your training provider and shown in a mapping document that you will include with your portfolio.

Your training provider may suggest a particular format for your portfolio, which ideally should be maintained online. We recommend that you update your portfolio with examples of work on a regular basis – it's easier to collect evidence in this way, rather than going back and finding it later. You can find more information about collating a portfolio of evidence in this course's EPA unit.
